## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                               |          |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>Recruiter's Problem – Solved using LLM API Cost Optimization</b><br>• Built an AI-powered document analysis platform using LLMs and LiteParse, reducing token usage by <b>90 percent</b> and processing documents in real time.<br>• Enabled real-time document insights through intelligent parsing and NLP-based information extraction.<br>• Optimized processing efficiency, saving over <b>1 million tokens</b> through smart compression strategies. | 🐙 GitHub |
| <b>AI-Powered Government Voice Call Automation System</b><br>• Built an AI-based voice calling system for automated government citizen communication<br>• Used Generative AI, STT, and TTS for multilingual voice interactions.<br>• Automated public announcements, scheme updates, and feedback collection.<br>• Improved outreach efficiency through real-time call processing.                                                                            | 🐙 GitHub |
| <b>Myntra Clone (E-Commerce Web Application)</b><br>• Developed a responsive e-commerce website inspired by Myntra using HTML, CSS, and JavaScript.<br>• Implemented product browsing, navigation, and interactive user interface features.<br>• Optimized website performance and mobile responsiveness for an enhanced user experience.                                                                                                                     | 🐙 GitHub |

## SKILLS

**Languages:** Python, Java, C, MySQL, MongoDB

**Machine Learning:** Deep Learning, CNNs, NLP, Feature Engineering, Data Preprocessing, Model Evaluation

**FullStack Development:** HTML, CSS, JavaScript

**Tools:** Git/Github, Google Cloud SDK

**Frameworks & Libraries:** TensorFlow, Scikit-learn, Pandas, NumPy, LLMs, FastAPI, REST APIs

## CERTIFICATIONS

|                                                              |                                                                   |
|--------------------------------------------------------------|-------------------------------------------------------------------|
| • Supported digital marketing campaigns and market research. | • Completed practical cybersecurity tasks and simulations(Forage) |
| • Salesforce certified Agentforce Specialist                 | • Successfully Completed NPTEL Cloud Computing Course (NPTEL)     |
| • Google Cloud Skill Badge – Prompt Design in Vertex AI      |                                                                   |

## POSITIONS OF RESPONSIBILITY

|                                                                                        |                       |
|----------------------------------------------------------------------------------------|-----------------------|
| • <b>Member</b> , Participated in the From Nuzvid We Lead youth leadership initiative. | 08/2025-present       |
| • <b>Team Lead</b> , Team Lead in Techzite Hackathon IIIT                              | 27/12/2025-30/12/2025 |

## ACTIVITIES

|                                                        |               |
|--------------------------------------------------------|---------------|
| • Deloitte Cyber Job Simulation Program (Forage)       | Agust 3, 2025 |
| • Awarded Google Arcade Swags (Google Arcade Program). |               |

## HONORS AND AWARDS

**72 hours hackathon** winners conducted by NASA

**National Level Hackathon** winner conducted by IIIT ,Nuzivedu

**National Level Hackathon** award winners conducted by IIIT SriCity

**National Level Hackathon** award winners conducted by T-HUB Telangana
